

CHARACTER

1.Heat shrink using infrared ray heater, all kinds of shrinkable films are available for our machines.
2.The conveyer speed for heat shrink is controlled by precision electric stepless type instrument, speed is adjustable and highly stable.
3.The heat shrink model is light and small. Its legs can be dismantled easily in order to save space.
4.It saves electricity and shrinks fast.
5.Adopting automatic temperature controller or constant temperature controller (according to customer need).
6.The conveyor belt for heat shrink can be made in to roll type, net type or Teflon net according to the character of the products.

SPECIFICATION

NAME	AP-4015A
MODEL	SHRINK TUNNEL
POWER	1phase 220V/240V
POWER CONSUMPTION	5KW
TUNNEL SIZE	L=700xW=400xH=150MM
PACKAGING SPEED	0~10 M/min
CONVEYOR SIZE	L=1050XW=400MM
MACHINE SIZE	L=1180xW=620xH=1050MM
